# Zoom

Zoom is a web/video conferencing tool that allows you to host one-to-one or group meetings and collaborate with colleagues and classmates on and off campus. Participants from remote locations can join Smith events and/or classes via a Zoom link. Presenters can share content and engage worldwide audiences via webinars. Zoom works across platforms and operating systems, including desktops, laptops, tablets and mobile devices.

## How can Zoom be used at Smith College?

Zoom allows you to be more flexible, inclusive and engaging with how you connect with people around the world. You could record your sessions and share them with your participants, for example, record a live class for students to review or pre-record lessons for students to watch outside of class. Enhance participants collaboration with breakout rooms for group meetings and shared whiteboards. Zoom provides a way to project wirelessly from any device in Smith classrooms, providing the ability to move about the classroom.

### Zoom could help you to:

1 Enhance  
collaboration

2 Record live  
meetings

3 Host guest  
speakers

## Smith Community Impressions

*“Our webinar program connects thousands of alumnae back to the college each year. Having a tool that is easy to use has been a huge help to that program. I now feel confident that our presenters will be able to navigate this platform with ease and focus on sharing their content.” – Smith Staff*

*“I connect my students with experts around the world through Zoom. It provides them with a sense of identity and belonging to the field they want to go into.” – Smith Faculty*

*“My experience with Zoom was excellent... I especially liked the recording feature, which I used for our last session. Were I to use Zoom again for such a cross-Atlantic class, I would record every session and use the recordings for pedagogical purposes with the class.”*

*– Smith Faculty*

*“Working more one-on-one in the small groups on Zoom was really helpful, and we were able to get more immediate feedback and critiques of our Korean.” – Smith Student*

*“Hearing about their struggles that led them to the place they are now really demystified the process of science for me. It showed me that they’re real people, they’ve had to go through struggles just like we do.” – Smith Student*

## How to get started

- For more information or to log in, visit: [smith.zoom.us](https://smith.zoom.us)
- For additional inquiries, contact the ITSC at [4its@smith.edu](mailto:4its@smith.edu) or 413-585-4487.
